(copy and paste the link in a new tab if your
browser does not support it directly)

In my portfolio website you will encounter some
projects that I built and others that I modified from
other creators in order to learn, practice and show my
skills.

I focused on the most important aspects of modern
frontend web development such as consuming api's and
building client side components as well as server side
components.

For me writing organized and efficient code is
important but I am still in the process of being better. I
try every single week to become a bit better at coding
and I am happy with the results that I am getting.

EDUCATION

**National University of Quilmes, ARGENTINA —
BACHELORS IN IT**

I have been studying for 3 years at University and I learned all
the fundamentals of software development. From
understanding how PC components work to understanding
how the frontend is connected to the backend in order to
build a full stack application. I also learned about the http
protocols and its security as well as how servers work. I
believe this overall of information gave me a solid foundation
which I used then while learning on my own in order to have a
solid picture of the IT ecosystem.

Internet, SELF LEARNING

Exploring more options than just University made me

SKILLS

HTML 5, CSS 3, TYPESCRIPT,
JAVASCRIPT, TAILWIND CSS,
REACT JS, NEXT JS 14.

SQL, postgresSQL, Node JS,
API CONSUMPTION, SERVER
SIDE RENDERING, SCSS
MODULES, DYNAMIC
ROUTING, GitHub, GIT.

FIGMA, PROTOTYPING,
PROMPTING ON CHAT GPT,
GOOGLE, W3SCHOOLS,
YOUTUBE AND
DOCUMENTATION FOR
RESOURCES.

VS CODE AS MY MAIN
EDITOR.

SOFT SKILLS

FAST LEARNER, I LIKE TO
ADAPT AS QUICKLY AS
POSSIBLE.

GOOD AT WORKING
REMOTELY.

ENGLISH, SPANISH,
INTERMEDIATE
PORTUGUESE AND BASIC
RUSSIAN.

GOOD AT WORKING IN
TEAMS.

understand that the Internet has all the information that I need in order to improve every single day. I use resources such as YouTube, W3Schools, documentation and even FreeCodeCamp. I have learned about html, css, js, ts, tailwind css, react js, next js, vue js, sql, api's, etc. Every single day I spend hours and hours researching on the internet for the latest tendencies in order to be updated and to keep learning.

I have found courses on YouTube that are way more professional than most teachings in any university, so the idea of being able to speed up my career from my home is very incredible for me.

WHAT I WANT

I want to be able to help your business while I develop my skills. I am looking for a place where I can focus on my work and at the same time I have room to be better. I have learned a lot and I have a lot more to learn. To be honest in IT there is always room to improve and staying updated to the latest tech is important.

If you consider I am a good candidate, just contact me based on the information listed on the right top of my cv.
